

# Acquisition finance from Growth Lending

## Do you...

...want to expand your company's reach, geographically or demographically?

...want to acquire a company that helps streamline operations or increase economies of scale?

...want to purchase a competitor or buy their assets to strengthen your own position?

Acquiring another business can be a quick and efficient way to promote growth, but often requires more cash than a firm's normal operating budget.

## Our solution

Growth Lending can leverage against your firm's sales ledger, or even against the book debts of the target company, to provide the funds needed to secure the purchase.

Raising acquisition finance in this way significantly increases business liquidity, leaving headroom within the facility to accommodate day-to-day working capital needs, as well as enabling purchases that would not otherwise be possible.

## How does it work?

We can fund against your company's sales ledger, in order to meet the price of acquiring another business

OR

We can fund against the book debts of the target company, which can be used to secure the funding in order to make the purchase

## What is the process?

1. Apply for funding via our [website](#), via [email](#) or by contacting a [member of our team](#)
2. One of our lending experts will contact you within 24 hours to get a better understanding of your requirements. We will provide an indicative offer so that you can move quickly with the acquisition
3. Once terms are agreed, we will underwrite your facility and provide you with a credit-backed offer

We fund faster than other lenders, so we can often provide funding within two or three weeks of first contact, giving you a valuable competitive advantage.

## Eligibility criteria

<b>Profitability</b>	Historically profitable (exceptions due to the impact of Covid-19 will be considered)
<b>Solvency</b>	Solvent with healthy balance sheets, ideally with a history of retained profits
<b>Support</b>	Supportive shareholders and investors
<b>Strategy</b>	A business plan or strategy to justify the acquisition (this doesn't have to be a formal presentation, but we want to see your vision for growth)

## Why choose invoice finance to fund your acquisition, instead of traditional funding methods?

**Flexible:** fund more than one acquisition and use excess funds for working capital

**Efficient:** there is no lengthy, traditional loan application process

**Tailored:** get a bespoke facility to meet your ongoing requirements

**Affordable:** only pay interest on the amount of funds taken from the line of credit

**Forward-thinking:** leverage against your own debtors to fund an acquisition and then leverage against the acquired firm's debtors to fund further purchases or growth
