

Invoice finance for international businesses

Alongside our existing invoice discounting and revolving credit facilities, Growth Lending has launched a new stream of funding, specifically for **international businesses with US dollar and Euro invoices**

How it works:

- Funding invoices in US dollars and Euros for overseas and UK-based companies
- Facility size ranges from \$10,000 to \$5,000,000
- Standalone facilities available – there is no requirement to fund a linked UK entity

What it can be used for:

- To provide short term working capital for larger customers or “one off” orders
- To fund export invoices where there is minimal appetite from the existing lender
- To support overseas subsidiaries with invoice finance from a UK-based lender

Highlights:

- ★ Typically 0.75% per month above base on the invoices financed
- ★ Bad debt protection included and no interest fees
- ★ No tie-in period
- ★ No security required for non-UK businesses
- ★ We can fund alongside an existing invoice finance provider on the UK entity

Success stories:

UK-based product development firm
\$300,000 facility
To finance invoices for a globally-recognised beverage manufacturer

UK-based FMCG wholesaler
€750,000 facility
To support a European subsidiary as part of international expansion plans

Digital marketing firm
\$1,000,000 facility
To provide short term liquidity by funding GBP and USD invoices
